

# AI 'eCommerce' Chatbot

## Your Sales Website's Best Companion

As of 2023, eCommerce sales accounted for approximately 20-25% of total global retail sales. Estimates for 2024 are between 30-35%.

As their growth continues, customers will expect increasing sophistication and a more personalized experience.

This clearly throws the focus on **customer services**. The experience of having the undivided attention of a patient, knowledgeable person who will cater to customers' every need, and go 'beyond expectations' to provide it.

Creating such experiences using human agents is prohibitively expensive, given the required volumes of customers and transactions.

Enter **versaChat 'eCommerce'**, our AI-powered Digital Assistant.

# What our AI-Powered 'eCommerce' Chatbot could do for your business.

The list is almost endless, and the capabilities of even our entry-level chatbot will blow your mind with the range of tasks it can undertake and the speed and accuracy with which it will do them. "Better than a real person", some say!

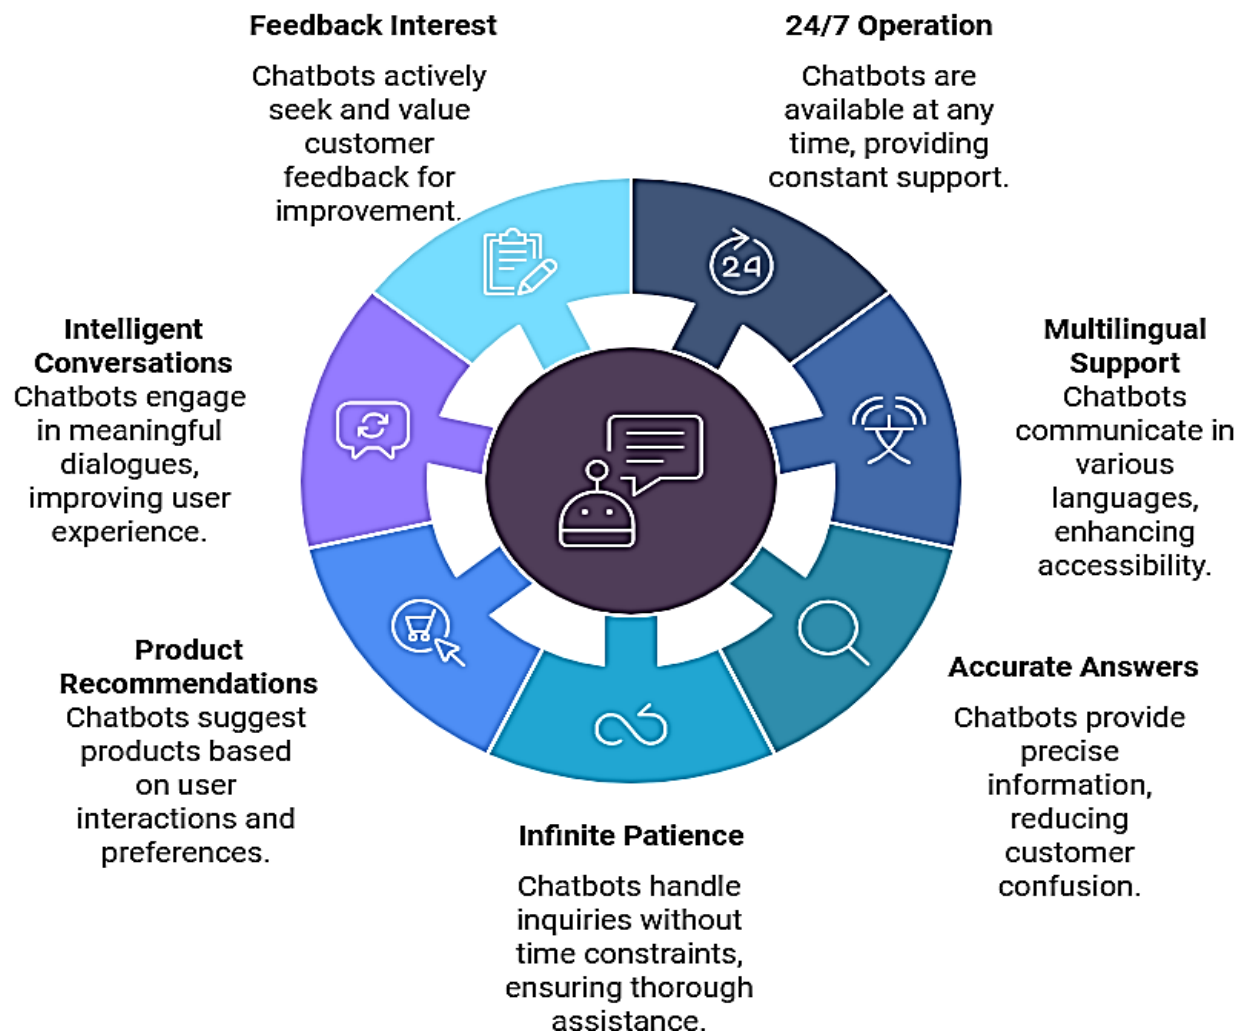

Our ***versaChat 'eCommerce' Chatbot***, can tackle the range illustrated on the left, and then some!. But, just as importantly, in addition, we supply a key priceless ingredient to help our clients take advantage of them - our **Expertise**.

We will consult, advise, recommend and tailor your solution to the precis needs of your particular business. And stay with you through its implementation and beyond.

Interested? See our examples on the next few slides and consider how a 'bot' created specifically for your business might keep it at the forefront of online retail sales..

# Benefits Your Customers Will See

# Benefits Your Business Will See
